

How to reference Transnetyx for a Journal Article

Transnetyx Inc.
8110 Cordova TN 38016
888-321-2113
www.Transnetyx.com

Overview

Founded in 2000, Transnetyx is a molecular diagnostics company based in Memphis, Tennessee that has built world's first fully automated genotyping system for Transgenic, Knock-Out and Knock-In mouse lines.

Process

Transnetyx uses quantitative or real time PCR for genotyping. If you would like more information regarding our process please contact us at customerservice@transnetyx.com

Example References

- Mice were genotyped by Transnetyx (Cordova, TN)
- Each mouse used was genotyped by Transnetyx (Cordova, TN)
- All mice were genotyped at weaning by commercial vendor (Transnetyx, Cordova, TN)
- Mouse genotypes from tail biopsies were determined using real time PCR with specific probes designed for each gene(Transnetyx, Cordova, TN).
